In addition to the specified maximum frame rate the devices generally also support all multiples of 5 lower than the given maximum frame rate.

A given device revision may have more than one name in different sales regions, but this table only lists one name per device. If you can't find your device please try to find the matching revision by using the USB PID and BCD or refer to the Logitech UVC Device list for more details.

Please note that this list does not contain all existing Logitech cameras. At this point it only lists UVC devices. There may also be other cameras with the same product name but a different USB Product ID (PID) and product number. All these cameras have USB Vendor ID (VID) 0x046D.
